WORKSMART
your professional business events partner

ABOUT THE PAVILION ORGANIZER

WORKSMART FOR EVENTS MANAGEMENT

WorkSmart is a specialized events development and management company based in the Kingdom of Bahrain that provides a comprehensive service to a wide range of clients across a variety of event activities at the local, regional, and international levels.

It was in the year 2002 when we took the first step in the development of business events under the Gulf Future Business Brand. In 2007, we became the first organization in Bahrain to initiate the Bahrain Pavilion at GITEX, Dubai. After 11 years in the business, we finally initiated the launch of Worksmart, a stand-alone company that solely focuses on the development and management of business events. This transition aims to emphasize our strengths and capabilities for planning, developing, managing, and organizing events.

Name	: Muktar Mirza

الجامعة الأهلية
AHLIA UNIVERSITY
BAHRAIN

Welcome to Ahlia University. Ahlia was the first private University licensed by Bahrain Government and we enrolled our first students in February 2003. Since then we have grown in all aspects: more students, more courses, more international collaborations – while at the same time maintaining our reputation for the highest quality in higher education. I therefore feel a great sense of pride in the achievements of Ahlia's students and staff as I write this welcome and I look forward to giving you a brief picture of life at Ahlia. Our story so far, our achievements in the past year and a glimpse of our future plans. Ahlia's success derives from the contribution of its staff, the involvement of its stakeholders, the support of the Government of the Kingdom of Bahrain and the guidance of our Board of Trustees and our founding body, the Arab Academy for Research & Studies. To all of these, I offer our sincere thanks.

Computer World (CW) is a Digital Transformation Systems Integrator, providing comprehensive end-to-end infrastructure, cloud, business productivity solutions and services that helps organizations such as Govt. oil, and gas, manufacturing, transportation, retailers, banking and financial services, service providers, enterprise businesses and partners - understand and meet the needs of their digitally empowered customers, quickly and cost-effectively.
